

The Energy Efficiency Upgrade Cycle

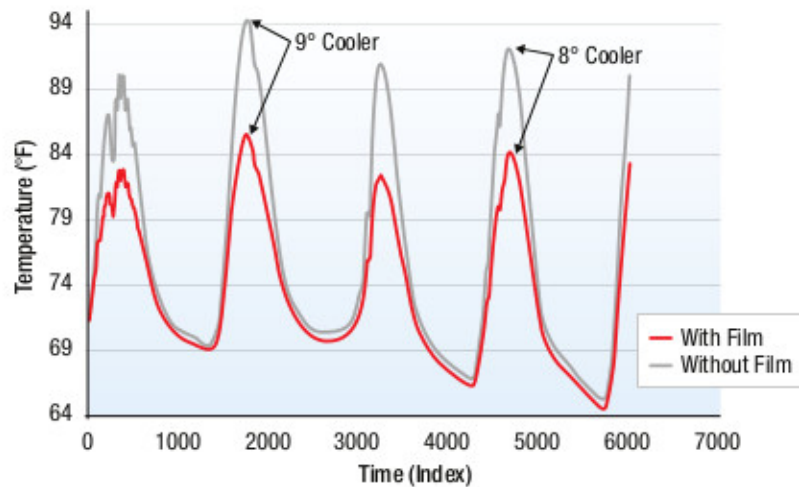

Optimize Your Building

There are many energy conservation technologies available to help you save money. It is essential not only to choose the right products, but also to complete your upgrades in a sequential order such that you can maximize your profits. Often envelope upgrades (such as window film) are overlooked and owners jump right to optimizing their HVAC system. If you create a more efficient building envelope before HVAC improvements, you can downsize your HVAC equipment in the future, enabling you to reach the maximum possible performance for your profits.

Comfortably Cool

3M™ Sun Control Window Film can reduce the temperature in direct sunlight by as much as nine degrees, making your space much more usable and comfortable. The graph below shows a four day temperature logging experiment conducted on an office building.

LEED Certification

Window films may be used toward the following LEED credits:

- SS-8
- EA-1
- MR1.1-1.2
- MR 5.1-5.2
- EQ-7.1
- EQ-7.2
- EQ-8.1-8.2
- ID
